ABOUT ME:

Computer Science student driven by curiosity and a hands-on approach to problem-solving. Passionate about Data Science and UI/UX Design, with hands-on experience building intelligent tools and user-friendly interfaces. Skilled at combining analytical thinking with design sensibility to deliver solutions that are functional, insightful, and engaging. Known for going beyond the syllabus, adapting quickly, and seeking real-world opportunities to build, learn, and grow.

EDUCATION:

prathyusha engineering college(batch 2023-2027)
BE-COMPUTER SCIENCE ENGINEERING

SKILLS:

PROGRAMMING

- Python
- REACT JS
- HTML
- CSS
- c (basic level)

UI/UX DESIGN

- FIGMA
- Adobe illustator
- photoshop

SOFT SKILLS

- SPOKEN ENGLISH
- JAPNESE LANGUAGE
- EVENT COORDINATOR
- CREATIVE THINKER

PROJECTS:

DATA SCIENECE PROJECT USING PYTHON

Developed an Article Research Tool using Python and Streamlit, integrating Generative AI to automate summarisation, topic classification, and key insight extraction from data science research articles.

MINI PROJECT:

JOB HIRING SYSTEM USING THE PYTHON

UI/UX PROJECTS (Figma):

Snacks Checkout UI/UX – 3D Model Designed a 3D snack checkout interface in Figma with realistic product visualization, applying depth and material design principles across cart, order summary, and payment screens.

Loading Page Design -Created an animated loading page with skeleton screens and micro-interactions in Figma, balancing visual appeal with clear performance feedback.

Groww App Clone -Designed a high-fidelity Groww app clone in Figma covering onboarding, stock discovery, and portfolio dashboard with a clean, investor-friendly layout.

CERTIFICATION:

- PYTHON COURSE CERTIFIED IN **CADEPT TECHYS**
- **UDEMY** python course
- **UDEMY** Gen AI

EVENT GONE THROUGH:

- HACKATHON IN SATHYABAMA UNIVERSITY
- WORK SHOP ON UI/UX DESIGNING & GEN AI
- PYTHON WORKSHOPS
